Subject Index of Volume 59

Absorption spectra
ion-forming processes on 248 nm laser excitation of benzophenone in aqueous solution: a time-resolved absorption and conductivity study, 243
Absorption spectra
exciton splitting of fluorescein disodium in polyethylene glycol 600, 123
vacuum UV absorption and excitation spectra of N_2H_4, 135
4-Acetoxy-2H-chromene
photolysis of 4-acetoxychromene adsorbed onto an Fe^{3+}-exchanged sepiolite, 379
Acridine orange
fluorescence quenching of acridine orange by aromatic amines in cationic, anionic and non-ionic micelles, 335
Alcohols
primary photochemical processes of the $PtCl_6^{2-}$ complex in alcohols, 153
All-*trans*-1,6-diphenyl-1,3,5-hexatriene
solvent effect on radiative and non-radiative transitions in all-*trans*-1,6-diphenylhexatriene, 273
Amines
fluorescence quenching of acridine orange by aromatic amines in cationic, anionic and non-ionic micelles, 335
solid state quantum yield determination of a novel base photogenerator, 105
Argon
193 nm excimer-laser-induced photooxidation of propene in argon matrices, 19
Aromatic nitriles
photochemical reaction between 1-naphthalenecarbonitrile and some arylalkenes, 297
Azides
triplet–triplet absorption of thioxanthone and triplet energy transfer to some organic azides, 29
Benzoic acid
photocatalytic hydroxylation of benzoic acid in aqueous titanium dioxide suspension, 385
Benzophenone
ion-forming processes on 248 nm laser excitation of benzophenone in aqueous solution: a time-resolved absorption and conductivity study, 243
bis[2-(*o*-chlorophenyl)-4,5-diphenylimidazole
on the photolysis of bis[2-(*o*-chlorophenyl)-4,5-diphenylimidazole] sensitized by 2-isopropylthioxanthone or Michler's ketone, 255
1,1-bis(*p*-Dimethylaminophenyl) ethylene
single-electron transfer from 1,1-bis(*p*-dimethylaminophenyl) ethylene to singlet oxygen in a polar aprotic solvent, 55

Chemical potential
chemical potential and temperature of light, 11
Chlorophyll-*a*
production of acyclic isoprenoid compounds during the photodegradation of chlorophyll-*a* in seawater, 369
Clays
photoreaction of nitrogen and water on montmorillonite clays loaded with hydrous ferric oxide, 191
Conductivity
ion-forming processes on 248 nm laser excitation of benzophenone in aqueous solution: a time-resolved absorption and conductivity study, 243

Ddz-based carbamates
solid state quantum yield determination of a novel base photogenerator, 105
Diallyl oxydiethylene dicarbonate
kinetic study of photoinitiated grafting of diallyl oxydiethylene dicarbonate onto cellulose, 99

1991 — Elsevier Sequoia, Lausanne

3-(*N*,*N*-dimethylamino)-2H-1-benzopyran-2-one
influence of the solvent on the emission of 3(*N*,*N*-dimethylamino)-2H-1-benzopyran-2-one, 221
Diphenylamine
effects of hydrogen bonding on the photocyclization of diphenylamines, 43
Dyes
electrochemical cell with stilbazolium merocyanines oriented in a nematic liquid crystal, 233
fluorescence quenching of acridine orange by aromatic amines in cationic, anionic and non-ionic micelles, 335
photoelectric conversion and fluorescence quenching in mixed-dye monolayers: inhomogeneous distribution of dyes, 341

Electron relays
intramolecular sensitized electron relays 1,1″,1‴-trialkyl[4,2′;4′,4″;6′,4‴]quaterpyridinium trichlorides, 61
Electron scavenging
intramicellar electron scavenging in the photo-oxidation of $Fe(bipy)_2(CN)_2$, 175
Electron transfer
electron transfer reactions mediated by acridine triplet state in aqueous solutions — triplet energy transfer from $Ru(bipy)_3^{2+}$ and photosensitized electron transfer from para-substituted phenols to methyl viologen, 73
single-electron transfer from 1,1-bis(*p*-dimethylaminophenyl) ethylene to singlet oxygen in a polar aprotic solvent, 55
Emission spectra
Exciton splitting of fluorescein disodium in polyethylene glycol 600, 123
Energy transfer
triplet–triplet absorption of thioxanthone and triplet energy transfer to some organic azides, 29

$Fe(bipy)_2(CN)_2$
intramicellar electron scavenging in the photo-oxidation of $Fe(bipy)_2(CN)_2$, 175

Fluorescein disodium
exciton splitting of fluorescein disodium in polyethylene glycol 600, 123
Fluorescence
fluorescence study of the weak interaction between pyrene and quaternary ammonium groups, 323
Fluorescence quenching
fluorescence quenching of acridine orange by aromatic amines in cationic, anionic and non-ionic micelles, 335
photoelectric conversion and fluorescence quenching in mixed-dye monolayers: inhomogeneous distribution of dyes, 341
FSO_3 radicals
quenching of $FSO_3(B_2E)$ generated by 193 nm photodissociation of FSO_2OF and $F_2S_2O_6$, 143

Grafting
kinetic study of photoinitiated grafting of diallyl oxydiethylene dicarbonate onto cellulose, 99
kinetic study of the photocrosslinking of 1,6-hexanediol diacrylate grafted onto cellulose in the presence of photocatalytic systems, 91
polypyridylruthenium(II) persulphate as photoinitiator in the grafting of vinyl monomers onto cellulose acetate, 81

1,6-Hexanediol diacrylate
kinetic study of the photocrosslinking of 1,6-hexanediol diacrylate grafted onto cellulose in the presence of photocatalytic systems, 91
Hydrogen bonding
effects of hydrogen bonding on the photocyclization of diphenylamines, 43
Hydrogen–nitrogen compounds
vacuum UV absorption and excitation spectra of N_2H_4, 135
Hydroperoxyradical
temperature dependence of the UV spectra of the HO_2 and CH_3O_2 radicals, 1
Hydroxylation
photocatalytic hydroxylation of benzoic acid in aqueous titanium dioxide suspension, 385

Hydroxyphenyl benzoxazole
solvtochromism and prototropism of 2-(3′hydroxyphenyl) benzoxazole and 2-(4′hydroxyphenyl)benzoxazole in the excited singlet state, 307

Irradiation
photochemical reaction between 1-naphthalenecarbonitrile and some arylalkenes, 297
production of acyclic isoprenoid compounds during the photodegradation of chlorophyll-*a* in seawater, 369
Isoprenoid compounds
production of acyclic isoprenoid compounds during the photodegradation of chlorophyll-*a* in seawater, 369
2-Isopropylthioxanthone
on the photolysis of bis[2-(*o*-chlorophenyl)-4,5-diphenylimidazole] sensitized by 2-isopropylthioxanthone or Michler's ketone, 255

Ketyl radicals
fragmentation of ketyl radicals derived from α-phenoxyacetophenone: an important mode of decay for lignin related radicals?, 265

Light
chemical potential and temperature of light, 11
Luminescence
luminescence quenching of $*[UO_2F_4]^{2-}$ in aqueous solution by anions, 163

Methyl orange
methyl orange as a probe of photoelectrochemical reactions sensitized by colloidal CdS, 199
Methyl viologen
electron transfer reactions mediated by acridine triplet state in aqueous solutions — triplet energy transfer from $Ru(bipy)_3^{2+}$ and photosensitized electron transfer from para-substituted phenols to methyl viologen, 73
Montmorillonite
photoreaction of nitrogen and water on montmorillonite clays loaded with hydrous ferric oxide, 191

Nitrophenols
photochemistry and environment. XIII: phototransformation of 2-nitrophenol in aqueous solution, 209,
photochemistry and environment. Part XIV. Phototransformation of nitrophenols induced by excitation of nitrite and nitrate ions, 357

Paramagnetic centres
electron paramagnetic resonance study of photogenerated radicals in titanium dioxide powder and its aqueous suspensions, 115
Phenols
electron transfer reactions mediated by acridine triplet state in aqueous solution — triplet energy transfer from $Ru(bipy)_3^{2+}$ and photosensitized electron transfer from para-substituted phenols to methyl viologen, 73
α-Phenoxyacetophenone
fragmentation of ketyl radicals derived from -phenoxyacetophenone: an important mode of decay for lignin related radicals?, 265
Phenylethyl hydroperoxide
free radical intermediates in the photoreaction of n–π and π–π triplets of quinones with α-phenylethyl hydroperoxide in C_6H_6, 37
Photocrosslinking
kinetic study of the photocrosslinking of 1,6-hexanediol diacrylate grafted onto cellulose in the presence of photocatalytic systems, 91
Photo-oxygenation
single-electron transfer from 1,1-bis(*p*-dimethylaminophenyl) ethylene to singlet oxygen in a polar aprotic solvent, 55
Photocatalysis
effect of silver deposits on the photocatalytic activity of titanium dioxide samples for the dehydrogenation or oxidation of 2-propanol, 181
Photocyclization
effects of hydrogen bonding on the photocyclization of diphenylamines, 43
Photodissociation
193 nm excimer-laser-induced photooxidation of propene in argon matrices, 19
quenching of $FSO_3(\tilde{B}^2E)$ generated by 193 nm photodissociation of FSO_2OF and $F_2S_2O_6$, 143
Photoelectric conversion
photoelectric conversion and fluorescence quenching in mixed-dye mono-

layers: inhomogeneous distribution of dyes, 341
Photoelectrochemistry
electrochemical cell with stilbazolium merocyanines oriented in a nematic liquid crystal, 233
Photogeneration
solid state quantum yield determination of a novel base photogenerator, 105
Photoinitiation
kinetic study of photoinitiated grafting of diallyl oxydiethylene dicarbonate onto cellulose, 99
photopolymerization of styrene initiated by phenacyl dimethyl sulphonium ylide–cupric chloride complex, 393
polypyridylruthenium(II) persulphate as photoinitiator in the grafting of vinyl monomers onto cellulose acetate, 81
Photolysis
electron transfer reactions mediated by acridine triplet state in aqueous solutions — triplet energy transfer from $Ru(bipy)_3^{2+}$ and photosensitized electron transfer from para-substituted phenol to methyl viologen, 73
ion-forming processes on 248 nm laser excitation of benzophenone in aqueous solution: a time-resolved absorption and conductivity study, 243
on the photolysis of bis[2-(*o*-chlorophenyl)-4,5-diphenylimidazole] sensitized by 2-isopropylthioxanthone or Michler's ketone, 255
photolysis of 4-acetoxychromene adsorbed onto an Fe^{3+}-exchanged sepiolite, 379
primary photochemical processes of the $PtCl_6^{2-}$ complex in alcohols, 153
primary photoproducts in the picosecond time domain from photolysis of hexacarbonyl and aminopentacarbonyl tungsten(0) complex, 285
vacuum UV absorption and excitation spectra of N_2H_4, 135
Photons
chemical potential and temperature of light, 11
Photopolymerization
photopolymerization of styrene initiated by phenacyl dimethyl sulphonium ylide–cupric chloride complex, 393
Photoproducts
primary photoproducts in the picosecond time domain from photolysis of hexacarbonyl and aminopentacarbonyl tungsten(0) complexes, 285
Photoreaction
free radical intermediates in the photoreaction of n–π and π–π triplets of quinones with α-phenylethyl hydroperoxide in C_6H_6, 37
Photoreduction
methyl orange as a probe of photoelectrochemical reactions sensitized by colloidal CdS, 199
photoreaction of nitrogen and water on montmorillonite clays loaded with hydrous ferric oxide, 191
Phototransformation
photochemistry and environment. XIII: phototransformation of 2-nitrophenol in aqueous solution, 209
photochemistry and environment. Part XIV. Phototransformation of nitrophenols induced by excitation of nitrite and nitrate ions, 357
Photoxidation
intramicellar electron scavenging in the photo-oxidation of $Fe(bipy)_2(CN)_2$, 175
Polypyridylruthenium(II) persulphate
polypyridylruthenium(II) persulphate as photoinitiator in the grafting of vinyl monomers onto cellulose acetate, 81
Propene
193 nm excimer-laser-induced photooxidation of propene in argon matrices, 19
Prototropism
Solvtochromism and prototropism of 2-(3′hydroxyphenyl) benzoxazole and 2-(4′hydroxypenyl)benzoxazole in the excited singlet state, 307
$PtCl_6^{2-}$ complex
primary photochemical processes of the $PtCl_6^{2-}$ complex in alcohols, 153
Pyrene
fluorescence study of the weak interaction between pyrene and quaternary ammonium groups, 323

Quenching
luminescence quenching of $*[UO_2F_4]^{2-}$ in aqueous solution by anions, 163
quenching of $FSO_3(\tilde{B}^2E)$ generated by 193 nm photodissociation of FSO_2OF and $F_2S_2O_6$, 143

Quinones
free radical intermediates in the photoreaction of n–π and π–π triplets of quinones with α-phenylethyl hydroperoxide in C_6H_6, 37

$Ru(bipy)_3^{2+}$
electron transfer reactions mediated by acridine triplet state in aqueous solutions — triplet energy transfer from $Ru(bipy)_3^{2+}$ and photosensitized electron transfer from para-substituted phenols to methyl viologen, 73

Sensitizer
intramolecular sensitized electron relays 1,1″,1‴-trialkyl[4,2′;4′,4″;6′,4‴]quaterpyridinium trichlorides, 61
Sepiolite
photolysis of 4-acetoxychromene adsorbed onto an Fe^{3+}-exchanged sepiolite, 379
Silver
effect of silver deposits on the photocatalytic activity of titanium dioxide samples for the dehydrogenation or oxidation of 2-propanol, 181
Solvatochromism
solvtochromism and prototropism of 2-(3′hydroxyphenyl) benzoxazole and 2-(4′hydroxyphenyl)benzoxazole in the excited singlet state, 307
Solvents
influence of the solvent on the emission of 3-(*N*,*N*-dimethylamino)-2H-1-benzopyran-2-one, 221
solvent effect on radiative and nonradiative transitions in all-*trans*-1,6-diphenylhexatriene, 273
Stilbazolium merocyanine
electrochemical cell with stilbazolium merocyanines oriented in a nematic liquid crystal, 233

Styrene
photopolymerization of styrene initiated by phenacyl dimethyl sulphonium ylide–cupric chloride complex, 393

Tetraalkylammonium halides
fluorescence study of the weak interaction between pyrene and quaternary ammonium groups, 323
Thioxanthone
triplet–triplet absorption of thioxanthone and triplet energy transfer to some organic azides, 29
Titanium dioxide
effect of silver deposits on the photocatalytic activity of titanium dioxide samples for the dehydrogenation or oxidation of 2-propanol, 181
electron paramagnetic resonance study of photogenerated radicals in titanium dioxide powder and its aqueous suspensions, 115
photocatalytic hydroxylation of benzoic acid in aqueous titanium dioxide suspension, 385
Tungsten complexes
primary photoproducts in the picosecond time domain from photolysis of hexacarbonyl and aminopentacarbonyl tungsten(0) complexes, 285

Uranyl ions
luminescence quenching of $*[UO_2F_4]^{2-}$ in aqueous solution by anions, 163
UV absorption
temperature dependence of the UV spectra of the HO_2 and CH_3O_2 radicals, 1
UV irradiation
electron paramagnetic resonance study of photogenerated radicals in titanium dioxide powder and its aqueous suspensions, 115
